A raft can save your life. So can sea water.

Van Ben Seawater Desalination Kit

NSN 4610-00-372-0592

Approximately seventy-one percent of our planet's surface is covered in water, yet most of it is undrinkable due to its salt content. Van Ben transforms seawater into salt-free drinking water making it a critical emergency supply for airplanes, maritime vessels, and life rafts.

How Van Ben works

Each Van Ben kit contains 8 desalination treatments. One treatment will desalt 470ml of sea water in 60 minutes. Just fill the kit's plastic bag with sea water. Add one of the kit's eight chemical bars to the bag. The process of desalting the water begins. The plastic bag has a filter that will allow only fresh water to pass, and a valve that can be opened and closed for easy use. Use the mending tape in the kit in case the bag tears. The kit container is made out of heavy, molded plastic. In the event the bag is unusable, the kit container may be used to desalt the seawater, too. See, we thought of everything.

No hassle shipping

Shipping is via **UPS Ground**. No HAZMAT packaging or labeling required.

Budget friendly

Shelf-life up to 5 years
