HeaterMeals EX

HEATER MEALS EX
THE SELF-HEATING MEAL
Designed for EXtended Storage

Self-Heating Entrées Designed for Extended Storage

Available in a variety case of 12 meal kits featuring 2 each of the 6 mouthwatering meals below.

The food in HeaterMeals EX is fully cooked, safety-sealed in a high barrier, flexible 4-layer foil pouch; then heated again under pressure to assure a safe, easy-to-store meal. The result is extended storage without refrigeration and a ready-to-eat meal which retains its natural moisture, texture and taste.

HeaterMeals EX offers up to a 5 year shelf life when stored properly, and are a simple solution for long-term emergency planning.

Lunch / Dinner Meals

Chicken Pasta Italiana

Zesty BBQ Sauce & Potatoes with Beef

Italian Style Pasta with Beans

Tex-Mex Four Bean Chili

Rotini & Kielbasa in a Spicy Sauce

Tandoori Seasoned Chicken with Brown Rice

A Hot Meal Anytime, Anyplace™

Self-Heating Meals that Sustain and Nourish

Our unique, patented, flameless food heater has heated over 1 BILLION meals since 1990. After your meal has been inserted into the bag, simply pour the included activator solution over the heater, tape it closed and re-insert into the box. Our incredible technology will produce heat and steam which will provide you with a piping hot meal in minutes!! Once finished with your delicious meal, all contents including the heater can be thrown away.

Here's Why HeaterMeals Are Ready-To-Eat...

Traditional canning has come a long way! All entrees used in HeaterMeals products undergo thermal processing in a state-of-the-art retort machine. This process eliminates microbial organisms that can cause food spoilage, resulting in flavorful meals that are safe to store without refrigeration or freezing for the entire shelf life of the product. There's also no need to use preservatives to seal in flavor or nutrition with the retort process.
